

# Forest Management Evaluation

## Timber Stand Improvements (TSI) and/or Thinning Practicum

You are the manager of this section of public forest land that is managed for multiple uses. In this stand, the objective is to maintain all **(List the species of trees to be left)** to benefit wildlife and timber production. Local markets include logs for lumber and veneer. There is no pulpwood market in the area. All unwanted trees may be sold to a local sawmill provided they have a minimum DBH of **\_\_\_\_\_** inches and at least one 16 foot clear log with a 10 inch top or larger.

**Please turn this paper into the practicum judge when finished.**
